

# SAVE ON SOLAR

RENEWABLE ENERGY, MEGA SAVINGS

# COMPANY OVERVIEW AT A GLANCE

2

Save on Solar partners collectively have over 20 years of experience as Real Estate Developers, Fund Managers, Green Energy Producers and Conservationists.

**Experience, passion and client satisfaction drives our team to deliver Solar Energy Solutions that result in long term savings for all our clients.**

Our innovative solar solutions are customized and carefully designed to achieve the real needs and goals of our customers. Committed to sustainable business and economic growth, our focus in commercial and industrial installations has allowed our customers to maximize their property values and lower their energy utility bills from the first day of installation.

## **WE ARE AFFILIATES WITH LEADING GREEN & RENEWABLE MICRO-UTILITY, CLEAN ENERGY PRODUCERS**

Our integrated approach provides:

- Enhanced project economics
- Single point of contact for due diligence & ongoing reporting
- Transactional cost benefits through sharing of due diligence
- Project mechanical and structuring proficiency

REA has developed and financed over 250 Renewable Energy projects since 2019. With experience in Solar, Wind, Biomass & Fuel Cells. REA works with both investors and developers to maximize the economics of renewable energy projects. Their approach integrates the investment, financing and services components of solar micro utility projects, providing enhanced project confidence and delivering attractive options for our clients.

## BUSINESS EXCELLENCE

# FREE POWER

We offer an unbeatable Smart Solar Energy Solution designed to provide you with up to 15% savings on your electricity bills.

## ZERO DOWN DOES NOT = \$0 COST

Don't get trapped in industry jargon. Solar energy providers often offer no money down financing and loan options that can be initially very appealing but ultimately cost much more money in the long run. You end up paying monthly fees for many years with long term liabilities on your balance sheet.

**For property owners who operate their own buildings, our Solar Energy Solution saves you money on your utility expenses, while adding significant value to your Real Estate Asset.**

## LET'S MAKE IT EASY!

As Solar Energy decreases your utility expenses, your net income and cash flow subsequently increases.

# THE PROCESS FAST & SEAMLESS

Every property is different and a bit unique, that's why our analytical team of experts generate custom tailored proposals to maximize your annual energy cost saving potential.

To get started, you simply need to supply our team with the location of your property & 12 months of your electricity utility bills. Once your location qualifies, an Account Executive will work closely to ensure all the necessary information is collected in order to create a detailed proposal for your review and acceptance.

Final Steps, our licensed team of Engineers and Technicians will Design, Install and Maintain your Solar System for absolutely FREE.

**YOU BEGIN SAVING WITHOUT SPENDING A DIME &  
YOU MAY EVEN QUALIFY FOR A NEW ROOF!**

1

## ONLINE & ONSITE CONSULTATIONS

Annual Utility Bill Analysis  
Property and Roof Assessment  
Energy Modelling and Solar Layout
